打开环境

```
> <div class="face">☹</div>
> <div class="tail-container">☹</div>
</div>
</div>
<!--$cat=$_GET['cat']; echo $cat; if($cat=='dog'){ echo 'Syc{cat_cat_cat_cat}'; }-->
> <div style="position: absolute;bottom: 0;width: 99%;">☹</div>
</body>
</html>
```

查看源码时发现一段被注释掉的源码。审计下

用get传递一个cat参数

要求cat=dog

构造payload

The screenshot shows a web browser window with the following URL: `http://ee6dd2d4-3ef3-4766-80fc-71ec67991072.node3.buuoj.cn/?cat=dog`. The browser interface includes buttons for 'Load', 'Split', and 'Run'. Below the URL bar, there are checkboxes for 'Enable Post data' (checked) and 'Enable Referer' (unchecked). The main content area of the browser displays a dark brown cat sitting on a red horizontal bar, which is part of a yellow, textured vertical post. To the right of the cat, the text `flag{5913dcab-ecdb-4c99-be9a-14c2249f758c}` is displayed. A small URL `https://blog.csdn.net/xixihawuwu` is visible in the bottom right corner of the browser window.
